APPENDIX: Coding Guidelines used for CSFII 1985

GENERAL GUIDELINES

1. NS (not specified) portions should be used if, after a callback has been made, measurements of portions remain an unlikely size, or too few dimensions are given (e.g., rectangle 1" x 3").

2. When NS sizes are applied, the following modifications may be used:

   a. "small serving" = 1/2 NS
   b. "medium serving" = NS
   c. "large serving" = 1-1/2 NS

3. One cube of meat, cheese, watermelon, and other foods served in approximately 1-inch cubes should be assigned weight for 1 cubic inch.

4. Final weight in grams is the amount eaten. It does not include refuse such as bones, shells, pits, rinds, etc., which may be included in the weight as purchased. If weight with bone, rind, shells, etc., is given, refer to converted weight in code book (e.g., "yield after cooking, bone removed").

   If raw weight is given for an item which was eaten cooked, refer to conversion in code book (1 oz raw, yield after cooking).

5. If contradictory measures are reported for the same food (e.g., 1 medium pork chop, 8 oz cooked, with bone), refer to supervisor.

6. For school lunch servings, if no quantities are provided, use NS weights.

7. For foods or beverages described as consumed over a period of time with one time of eating reported and one quantity reported, code as reported but code Q. 19 (What called) as 9. This code "9" will designate extended consumption.

GUIDELINES FOR FOOD GROUPS

MILK AND MILK PRODUCTS

1. "Raw" or "fresh" milk--code as whole milk.

2. If amount of milk used on cereal is unknown, and a guideline is not already listed in the manual for that type of milk, use 1/2 cup milk per 1 cup cereal.

3. Ice cream with a chocolate base (i.e., all of the ice cream is chocolate), even though it includes other ingredients such as nuts, cookies, marshmallows, etc., should be coded as chocolate.

Ice cream which is only partly chocolate base (e.g., Neopolitan)--code as flavors other than chocolate.

MEAT, POULTRY, FISH

1. When a cooking method reported by the respondent is not listed in the manual for that food item, and more than one cooked code is available, refer item to supervisor.

2. If weight is reported for a meat which is usually purchased raw, with bone (pork chop, chicken drumstick) then the weight must be specified cooked or raw and with or without bone. If not specified, a callback is necessary.

3. For luncheon meats, use the same weight even if the meat is cooked further (e.g., 1 thin slice bologna, whether fried or not fried = 14 g).

4. "Barbecued" meat--use weight for "broiled" unless a sauce is mentioned. If sauce is mentioned in description, use code from subgroup 27.

5. When one unit is reported (1 pork chop, 1 chicken drumstick) but not relative size (small/medium/large), use weight for medium.

6. Meat mixtures

   a. Code by mixture name, i.e., goulash, when several choices are available based on ingredients.

   b. In deciding whether a mixture should be included in subgroups 271 or 272 which do not include vegetables or in subgroups 273 or 274 which do include vegetables, base the choice on vegetables other than onions.

   c. If mixture contains tomatoes, it should be coded as a tomato-base sauce item.

   d. Sandwiches--See guidelines for fast food sandwiches, breakfast sandwiches, and sandwich ingredients.

EGGS

1. When 1 whole egg is reported but not its size, use weight for large egg.

2. Fat is included in recipe for fried and scrambled eggs and omelets. Therefore, if fat is reported separately (egg fried in 1 T. butter) do not code as a separate line item.

GRAIN PRODUCTS

1. If a piece of pie or cake is described as a proportion of the whole (i.e., 1/8) and the diameter of whole is unknown, assume 9".

FRUITS

1. When one unit is reported (1 apple) but not relative size (small/medium/large), use weight for the medium.

VEGETABLES

1. Cooked vegetables include canned and cooked from fresh or frozen.

2. Vegetables cooked with meat but reported as individual items (e.g., 1/4 cup sliced carrots from beef stew)--code as vegetables, cooked, fat added in cooking.

3. When one unit is reported (1 tomato) but not relative size (small/medium/large) use weight for medium.

4. Yams--American-type yams are included in sweetpotato codes (subgroup 734). Puerto Rican or South American yams are coded in Puerto Rican starchy vegetables (subgroup 719).

5. Vegetable mixtures that are not included in the code book and are not separately proportioned--code each vegetable as an equal proportion of the whole.

   (Note: Commercial vegetable mixtures, particularly those containing sauces or numerous vegetables, may require market checking and new codes.)

6. Salads--See salad guidelines.

BEVERAGES

1. Freeze-dried coffee--code as powdered instant.

SALAD GUIDELINES

Salad Coding Guidelines are to be used when salad ingredients are listed but no amounts or proportions are reported. When possible, existing codes in the coding manual should be used. If an existing code is used, only the total amount of the salad is needed; do not proportion ingredients for those salads.

SALADS

Salads are to be classified as one of two types for coding purposes. TYPE I salads have greens as their base; TYPE II salads do not.

TYPE I: Salads with greens as their base

The following section, Salad Ingredients, contains guidelines for quantifying salad ingredients. The items are grouped according to their "typical" predominance in salads.

For each cup of salad reported, the total volume of items added to the greens base, that is, from Groups A and B combined, must not exceed 8 T (8 tablespoons)*. The amount of greens reported should equal the total volume of salad reported minus the volume of added ingredients (e.g., 1 cup total - 8 T added items = 1/2 cup greens).

Salad Ingredients

A: Items generally used in small quantities

Bacon bits	Mushrooms(chopped,sliced)	Seeds
Bamboo shoots	Nuts	Sprouts
Cheese, dry, grated	Olives	
Chopped egg	Onions	
Croutons	Radishes	
	Raisins	

1. Allow 1 T per cup of salad for each ingredient if 1 to 4 ingredients from this group are included (4 T maximum). (e.g., bacon bits, croutons, and chopped egg are reported; 1-1/2 cups of salad eaten; record 1-1/2 T per item)

2. If 5 or more ingredients from this group are reported, proportion equally for a total of 4 T (the maximum allowed for GROUP A items). (e.g., parmesan cheese, garbanzo beans, sunflower seeds, onions, radishes, and nuts are reported; 1 C of salad eaten; record 2 tsp. per item)

B: Items generally used in larger quantities

Avocado	Egg wedges	Pea pods
Broccoli	Fruit	Pickled beets
Carrots	Garbanzo beans	Tomatoes
Cauliflower	Green pepper	Zucchini
Celery	Meat, fish	
Cheese, excl. dry, grated	Potato salad	
Cucumber	Cole slaw	
	Macaroni salad	

1. Allow 2 T per cup of salad for each ingredient in this group, if 1 to 4 ingredients from this group are included (8 T maximum).

2. If 5 or more ingredients from Group B are included, proportion equally for a total of 8 T.

* For combinations of salad items which exceed the 8 T maximum, use the following chart:

CASE	GROUP A TOTAL	GROUP B TOTAL	TOTAL
1) 4 or more Group B items and 4 or more Group A items	2 tbsp	6 tbsp	8 tbsp
2) 3 Group B items and:			
a) 3 Group A items or	2 1/2 tbsp	5 1/2 tbsp	8 tbsp
b) 4 Group A items	3 tbsp	5 tbsp	8 tbsp
3) 4 Group B items and:			
a) 1 Group A item or	1/2 tbsp	7 1/2 tbsp	8 tbsp
b) 2 Group A items or	1 tbsp	7 tbsp	8 tbsp
c) 3 Group A items	1 1/2 tbsp	6 1/2 tbsp	8 tbsp

TYPE II: Salads which do not have greens as their base

Proportion ingredients equally by volume (e.g., if 8 items are reported in 1-1/2 C (24 T) of salad, allow 3 T per item).

SALAD DRESSINGS

Salad dressings, if used, are not included in the total volume. Dressings are to be reported and quantified separately.

FAST FOOD SANDWICH GUIDELINES

Fast food sandwiches should be coded as indicated below when the respondent has stated that the sandwich was consumed without adding any "unusual" ingredients.

Fast Food Establishment	Sandwich Name	Code
Arby's	Roast Beef	275-1301
Burger Chef	Big Chef	275-1030
	Double Cheeseburger	275-1033
	Hamburger	275-1051

	Chili, Cheese, and Beef	275-1042
	Double Hamburger	275-1055
	Single Hamburger	275-1056

FAST FOOD BREAKFAST SANDWICH GUIDELINES

Each component of a fast food breakfast sandwich which is mentioned in the sandwich description should be coded separately using the code and weight information on this sheet. For instance, Arby's sausage and egg croissant would be coded as 511-6600 (56g), 311-0500 (46g), and 252-2140 (27g). Use the appropriate partition code for "part of a sandwich".

Sandwich component	Code	Weight
Biscuit	521-0100	37 g
Croissant	511-6600	56 g
English muffin	511-8602	50 g
Bread, white (Include bread, NFS)	511-0101	17 g
Bread, whole wheat	512-0102	21 g
Egg	311-0500	46 g
Cheese	144-1020	21 g
Ham	223-1100	21 g
Bacon	226-0100	16 g
Sausage	252-2140	27 g
Canadian bacon	225-0101	23 g
Steak	214-2010	22 g

SANDWICH INGREDIENT GUIDELINES

INGREDIENT	* REGULAR-SIZE SANDWICH Amount	Gram Wt	** LARGE-SIZE SANDWICH Amount	Gram Wt
