

# 2nd Grade Field Trip

## GPS Treasure Hunting at

### EOARC

Teaching kids how to use GPS Units to find their way to Treasures!

GPS Fun Facts: GPS stands for Global Positioning System, it was developed back in 1978 for the US Military and approved for public use in 1983 by Ronald Reagan. There are over 24 satellites and a GPS unit needs at least 4 to work correctly. GPS units are used for emergency vehicles, planes, military, research, driving, hunting, treasure hunting and much more.
