

Citation for

2009 Distinguished Career Recognition

Dr. Philip A. Harrison was awarded a Distinguished Career Recognition based on his significant contributions in the area of biochemistry of carbohydrates in forage species. The work that he performed formed the basis of carbohydrate analysis at FRRL (*principally fructans*) to support its mission and provided benchmark information for methodologies that are now in routine use by the scientific community. His work dramatically increased the national and international stature of the FRRL.
