

Citation for

2009 FRRL Extraordinary Achievement Award

Dr. Kevin B. Jensen was awarded the FRRL Extraordinary Achievement Award because of his numerous contributions that have gone far beyond his duties as Lead Scientist. These included: spending considerable time in spearheading discussions concerning the design and space configuration for a new building, facilitating the engineering inspection of FRRL, leading efforts to obtain and efficiently spend stimulus funding to supplement the FRRL budget, recruiting visiting scientists and graduate students from China to participate in mutually beneficial research, and effectively closing out the 2009 FRRL budget. Fellow scientists and coworkers are grateful for these selfless accomplishments and exemplary service.

Nominated by: Blair Waldron, Ivan Mott, Mike Peel, Joseph Robins, and Steve Larson
