

## Citation for 2010 Outstanding Support Staff Award

Ms. Carolyn S. Jaussi has been a dedicated FRRL employee for more than 23 years. Originally her work at FRRL focused on tissue culture and greenhouse plant culture, but later changed to endophyte identification, extraction and insertion. She wholeheartedly immersed herself in her changed assignment and has become an expert in fungi and endophytes, while remaining productive in her other responsibilities. She is a valuable knowledge resource for lab safety and chemical hygiene, and is always willing to share her knowledge with others. Carolyn has a great work ethic and positive attitude. Because of her numerous, long-term contributions that go far beyond her regular support-scientist responsibilities, Carolyn is well deserving of the FRRL Outstanding Support Staff Award.

**Nominated by:** Kevin Connors, Lin Johnson, and Kim Thorsted
