

## Citation for 2010 FRRL Research Achievement Award

Dr. Thomas A. Jones is a very deserving recipient of the FRRL Research Achievement Award. Tom has had a distinguished career of more than 24 years at FRRL in plant breeding and genetics. He has made numerous contributions to the development of North American plant materials for revegetation of disturbed rangeland ecosystems in the western U.S. Tom has evaluated plant materials for their capacity to perform specific ecological functions and authored numerous publications showcasing this concept. He routinely reaches out to a wide variety of rangeland ecologists and land managers in his research. Tom is a very effective spokesperson for FRRL both nationally and internationally in promoting the development of native plant materials.

**Nominated by:** Tom Monaco
