Western Wheatgrass Density (Tillers per m²)

Red Lines = CARM Pastures
Black Lines = TRM Pastures
Western Wheatgrass Density

(Post-treatment Tillers per m²)

Statistical model that:
1) Accounts for the paired pasture design (blocks)
2) Accounts for pre-treatment WW levels in each pasture (mean of 2013 and 2014)
3) Normalizes data to meet statistical assumptions using natural log transform
