

Greeting AGMers,

The move went smooth and the afternoon cool down has been nice break from the 90's we've been seeing lately. Even better news, the **AGM vegetation early season sampling is complete**, well done Veg Crew!

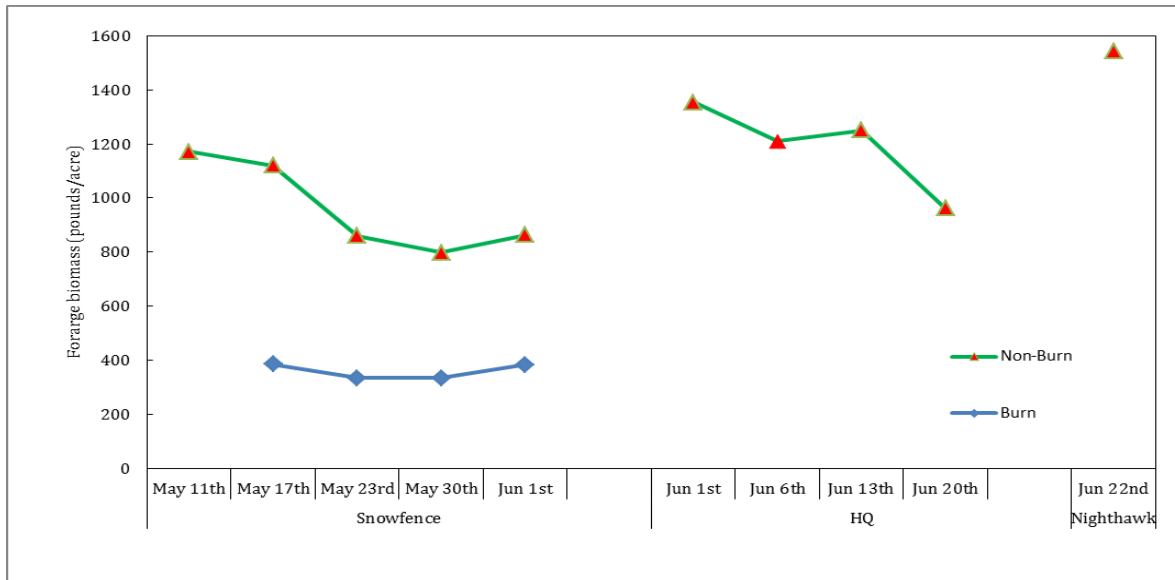

Precipitation is at **8.1" year-to-date** and we've **received 0.29"** in June. Where did the rains go?

Highlights of Happenings:

- **No mix-ups or sick to report.**
- We left **HQ VOR** at 4.15cm or **962.77 pounds/acre** and **entered Nighthawk** with **1542.27 pounds/acre** or 7.79 cm.

Above: Represents Headquarters VOR at exit and Nighthawk VOR upon entry.

- We removed the collars & pedometers this morning for data download and they'll redeploy tomorrow.
