Greetings CARMe rs!

CARM moved Aug 17th, an all hands on deck effort. Huge thanks to Stakeholders for reacting quickly.

Let's Recap!

Ridgeline Stats

- Loamy/Sandy Soils
- Cool & Warm Season Grasses
- Threshold 500 pounds/acre
- Scheduled rest in 2017, however grazed 10 days due to well issues in South.
What's in our cup?
Less than 10% Soil Moisture, in other words, not much in our cup.
Nighthawk Exit Forage

CARM dipped below their pasture threshold, but the birds might thank them later.

NOTE: Empty (E) is set at our pasture threshold of 500 lbs/acre NOT Zero lbs/acre.
On the ground in Ridgeline:

NOTE: Graph represents the percentage of robel hits by species.

The cattle are grazing spread out across all topography, very content.
Tech Note:
- Clipping finished.

This Week

Last Week
Up & Coming

- Thunder Basin Field Day
- Collar & Pedometer download
- Monthly Weights

On behalf of the USDA-ARS Rangeland Resources & Systems Research Unit, I thank you all for your continued participation in this project.

Happy Trails!
