Registration of DT676 Loose Smut Resistant Durum Wheat Germplasm

In Volume 2, Number 2, page 156, in the registration of DT676 Loose Smut Resistant Durum Wheat Germplasm, the DOI number is listed as 10.3198/jpr2007.06.0342. The correct DOI number is 10.3198/jpr2007.06.0342crg.

Registration of ‘Bill Brown’ Wheat

In Volume 2, Number 3, page 218, in the registration of ‘Bill Brown’ Wheat, the registration number is listed as Reg. No. CV-133. The correct registration number is Reg. No. CV-1025.
Strengthening the profession, supporting advances in crop science and realizing a solution to global hunger can only be realized by nurturing young crop scientists to provide leadership in the coming decades.

To meet this challenge and celebrate its 50th anniversary, the Crop Science Society of America has developed the Golden Opportunity Scholars Institute.

The Institute encourages and inspires promising undergraduate students from all regions of the U.S. and the world to enroll in crop science-related programs at the college and university level and eventually become the next generation of leaders in our profession.

**Golden Opportunity Scholars**

- Participate in a Golden Opportunity Scholars Symposium at the CSSA Annual Meeting
- Participate in a Mentor Network and interact with prominent crop scientists
- Receive a stipend to defray symposium attendance expenses
- Are individually recognized at the Annual Meeting
- Receive membership in the CSSA Golden Opportunity Scholars alumni organization

**Invest in the future.**

Support the Golden Opportunity Fund.

Discover the Groundbreaking Advances in Agricultural Systems Modeling Series

The first in the groundbreaking Advances in Agricultural Systems Modeling series, Response of Crops to Limited Water: Understanding and Modeling Water Stress Effects on Plant Growth Processes compiles the work of world experts, systematically presenting recent knowledge of water stress effects, and emphasizing the knowledge synthesis that will move agriculture forward.

Agriculture today requires a whole-system quantitative approach, and farmers need simple management tools derived from robust models. Learn how modeling is addressing crop management in the face of competing water demands, depleted aquifers, drought, and changing plant water requirements due to global warming.

Advances in Agricultural Systems Modeling
Transdisciplinary Research, Synthesis, and Applications
Laj Ahuja, Series Editor

The American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America are taking a leadership role with the initiation of this new series. The series will
• Advance critical transdisciplinary research, and its synthesis and quantification
• Encourage collaboration among top researchers
• Promote the application of models to solve practical problems
• Achieve better instruction in models and their applications

2008, Hardcover, 452 pages
ASA–CSSA–SSSA
Item number: B40721
