January 23, 2020

Dear Valued Customers,

I want to say hello and hope all is well with everyone's start to this new year!! I also want to explain what will be happening this year for those interested in purchasing true Line 1 genetics. We are going to have several Line 1 and Angus bulls available this year during a bull evaluation day on Saturday, February 22, 2020.

This will be formatted a bit differently than in the past. The cattle will be in small pens in front of our scale house. Everyone will get a bidder number when they check in and cattle can be viewed anytime. If you cannot make it to the sale, cattle are available to view anytime.

There will be a large board with each bull's number posted on it along with a starting bid and squares below to bid in. Simply write your buyer number in the square of the amount you wish to bid. Bidding will start at 11 am and run until 1 pm. If the bidding is completed early, we will collect the numbers and proceed to the office, where refreshments will be provided. In the event of a bid off, we will do so at this time.

In addition to the sale bull offering, a select group of replacement Line 1 and Angus heifer calves will be available. Our coming yearling bulls will also be on display. Since, we cannot guarantee semen on these bulls this young, we are trying to gauge interest. These bulls will be offered in April after successful semen testing.

As many of you know, I am interested in starting an ET Line 1 herd. We have tried a few things with very limited success, however, this year we are going to take several promising heifer calves and hopefully some proven cows to really get this project underway in 2020. We will be using black baldie cows from our Physiology herd as recip cows. I'm very excited to begin and get something solid started. I would love to hear any feedback you might have about this project. I hope this note finds everyone doing well and I hope to see you all on February 22.

Sincerely,

A handwritten signature in black ink that reads "Brad A. Eik". The signature is written in a cursive style with a large, sweeping flourish at the end.

Brad A. Eik
