

Hard Winter Wheat Workers Business Meeting  
Mead, Nebraska, June 2 2004  
Minutes

1. Business meeting was held at the conclusion of the annual wheat breeders' field day. A note of thanks is extended to Steve Baenziger, Lori Divis, Mitch Montgomery, Jeff Noel, and Jerry Bohlmann for help with hosting this year's program.
2. Field day in 2005 will be held in Oklahoma, sometime in May. Lahoma (as of this writing) is likely location. Scheduling will avoid conflicts with International Wheat Quality Conference, May 23-26, Manhattan, KS.
3. Bob Bowden, USDA-ARS, Manhattan, KS provided an update on status and activities at the Regional Genotyping Center in Manhattan, KS.
4. Brad Seaborne, USDA-ARS gave an update on Wheat Quality Council activities and progress on committee work attempting to establish hard winter wheat quality targets – good luck to these fellows! WQC samples still will be submitted to the USDA-ARS-GMRPL in Manhattan, but milling will be conducted at Kansas State University. Also, relational quality database now will be updated in real time. Wheat Quality Council samples will be limited to one check and two experimental lines per program.
5. Personnel changes in the region were announced.

Meeting adjourned.

Robert Graybosch  
Secretary  
Hard Winter Wheat Workers
