

Seasonal 180 Day L/A Appointments

The USDA-ARS Northern Great Plains Research Laboratory seeks highly motivated individuals for the following positions:

To assist in field and laboratory data collection for projects associated with research on crop and rangeland agro ecosystems. In the field, the incumbent will play an active role soil and plant sampling, measuring soil-water parameters, and evaluating basic physiological characteristics of plants. Laboratory activities will include processing soil and plant samples for analyses and evaluating of basic indicators of soil quality. The incumbent will also assist with data entry into a basic spreadsheet program. Individuals applying should be interested in learning new field and laboratory protocols for evaluating soil quality, have a willingness to work on diverse tasks, and be committed to a teamwork approach to meet project goals.

We also have a couple positions within our maintenance department. Duties to include: Lawn mowing, painting, tree trimming, weed eating, and minor janitorial duties.

The last opening is within our mechanic shop. Duties will be maintaining vehicles (such as oil changes, cleaning and washing, tire repair, etc.), farm equipment, and assisting the maintenance mechanic with their duties.

Interested individuals can either drop off or mail their resume and transcript to:
