Biological Science Aid—agronomy

full-time summer, part-time during school year

Brief Description of Duties:

The employee will assist in agronomic research in the field, laboratory, and greenhouse. Primary responsibilities will include collecting and processing plant and soil samples, measuring growth stages of field crops, identifying weed species, monitoring field plots for pest damage/disease presence, and entering and organizing data. This paid position may qualify as an internship at South Dakota State University.

Salary:

\$16.36 per hour

Start date:

May 19, 2024, flexible
