

Dr. Chenghai Yang is a research agricultural engineer with the USDA-ARS Aerial Application Technology Research Unit in College Station, Texas. Since receiving his Ph. D. degree in agricultural engineering from the University of Idaho in 1994, Dr. Yang has been doing research on the development and application of multispectral and hyperspectral remote sensing technologies for precision agriculture and pest management. His recent efforts have focused on developing and evaluating low-cost airborne imaging systems for mapping crop pests for variable rate ground and aerial chemical applications. He has authored/coauthored over 280 technical publications, including 120

peer-reviewed journal articles and a dozen books/book chapters. He serves on a number of national and international professional organizations and as an editor or associate editor for five scientific journals.
