

As previously announced, this was to be the site of a keynote presentation on "Genes in silico -- applications of computer technology to gene and genome analysis" by Drs. Craig Venter and Anthony Kerlavage, The Institute for Genome Research (TIGR).

Unfortunately, we learned on 17 April, that Drs. Venter and Kerlavage were unable to provide this keynote presentation due to an unforeseen heavy work schedule. We apologize for any inconvenience to our visitors. Alternative sites for information on this developing and important area of science include:
