# Small Grains 2023 Summary

## September 2023

# USDA

**All wheat** production totaled 1.81 billion bushels in 2023, up 10 percent from the 2022 total of 1.65 billion bushels. Area harvested for grain totaled 37.3 million acres, up 5 percent from the previous year. The United States yield was estimated at 48.6 bushels per acre, up 2.1 bushels from the previous year. The levels of production and changes from 2022 by type were: winter wheat, 1.25 billion bushels, up 13 percent; other spring wheat, 505 million bushels, up 5 percent; and Durum wheat, 59.3 million bushels, down 7 percent.

**Oat** production was estimated at 57.0 million bushels, down 1 percent from 2022. Yield was estimated at 68.6 bushels per acre, up 3.8 bushels from the previous year. Harvested area, at 831 thousand acres, was 7 percent below last year.

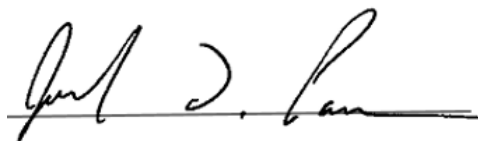

**Barley:** Production was estimated at 185 million bushels, up 6 percent from the 2022 total of 175 million bushels. The average yield, at 72.4 bushels per acre, was up 0.8 bushel from the previous year. Producers seeded 3.10 million acres in 2023, up 5 percent from 2022. Harvested area, at 2.56 million acres, was up 4 percent from 2022.

<b>Total</b> .....	1,646,254	1,649,713	1,811,977

## Wheat Class Percentage Estimates

The following percentages are the basis for the United States wheat production by class estimates each year. These estimates are based on the latest varietal or class survey data available. These end-of-season percentages will be used during the 2024 forecast season. However, if an unusual situation significantly distorts a State's normal distribution, then updated percentages will be used to forecast the production by class.

## Winter Wheat Head Population

The National Agricultural Statistics Service conducted objective yield surveys in 10 winter wheat estimating States during 2023. Randomly selected plots in winter wheat fields were visited monthly from May through harvest to obtain specific counts and measurements. Data in this table are actual field counts from this survey.

## Crop Comments

**Oats:** Production in 2023 was estimated at 57.0 million bushels, down 1 percent from 2022. Yield was estimated at 68.6 bushels per acre, up 3.8 bushels from the previous year. Harvested area, at 831 thousand acres, was 7 percent below 2022. Record low acres were planted in California, Minnesota, Ohio, Texas and Wisconsin. Record low acres were harvested in Georgia and Ohio. Record high yields were estimated in Illinois, Kansas, Missouri, and Oklahoma.

Nationally, oat producers seeded 49 percent of the 2023 acreage by April 30, five percentage points ahead of the previous year but 3 percentage points behind the 5-year average. Fifty-three percent of the oat acreage was emerged by May 14, nine percentage points ahead of the previous year but 2 percentage points behind the 5-year average. Heading of the oat acreage advanced to 70 percent complete by June 25, eighteen percentage points ahead of the previous year and 8 percentage points ahead of the 5-year average. Oat producers harvested 49 percent of the acreage by August 6, five percentage points ahead of the previous year but 1 percentage point behind the 5-year average. At that time, harvest progress was at or ahead of the 5-year average in 6 of the 9 weekly *Crop Progress* estimating States. Eighty-two percent of the Nation's oat acreage was harvested by August 27, three percentage points ahead of the previous year but 3 percentage points behind the 5-year average. As of September 10, ninety-five percent of the oat acreage was harvested, 1 percentage point ahead of last year but 1 percentage point behind the 5-year average.

**Barley:** Production was estimated at 185 million bushels, up 6 percent from the 2022 total of 175 million bushels. The average yield, at 72.4 bushels per acre, was up 0.8 bushel from the previous year. Producers seeded 3.10 million acres in 2023, up 5 percent from 2022. Harvested area, at 2.56 million acres, was up 4 percent from 2022.

Record low planted acres were estimated in California, Michigan, New York, Utah, and Wisconsin. Record low harvested acres were estimated in Wisconsin. Record high yields were estimated in California, Delaware, Idaho, Maryland, New York, and Pennsylvania. Record low production was estimated in Wisconsin.

One percent of the Nation's barley acreage was planted by April 9, nine percentage point behind the previous year and 7 percentage points behind the 5-year average. Nationwide, barley producers seeded 10 percent of the Nation's acreage by April 23, thirteen percentage points behind the previous year and 12 percentage points behind the 5-year average. By April 23, emergence was evident in 1 percent of the Nation's barley acreage, 2 percentage points behind the previous year and 4 percentage points behind the 5-year average. Nationally, 86 percent of the barley acreage was sown by May 28, three percentage points ahead the previous year but 4 percentage points behind the 5-year average. Fifty-five percent of the barley acreage emerged by May 28, five percentage points behind the previous year and 12 percentage points behind the 5-year average. Heading of the Nation's barley acreage advanced to 37 percent complete by July 2, three percentage points behind the previous year and 10 percentage points behind the 5-year average. By July 30, barley producers harvested 5 percent of the Nation's acreage, equal to both last year and the 5-year average. Overall, 50 percent of the barley acreage was reported in good to excellent condition on August 6, five percentage points below the same time last year. By September 17, ninety-three percent of the barley acreage was harvested, 1 percentage point behind the previous year and 2 percentage points behind of the 5-year average.

**Winter wheat:** Winter wheat production for 2023 totaled 1.25 billion bushels, up 13 percent from the 2022 total of 1.10 billion bushels. The United States yield, at 50.6 bushels per acre, was up 3.6 bushels from 2022. Area harvested for grain was estimated at 24.7 million acres, up 5 percent from 2022. Record low planted and harvested acres were estimated in Utah in 2023. Record high yields were estimated in Delaware, Illinois, Indiana, Kentucky, Maryland, Missouri, Montana, New Jersey, New York, North Carolina, Ohio, Tennessee, Texas, and Virginia for 2023. The eastern third of the United States had better conditions than the rest of the country.

Compared with 2022, harvested acreage was up 2 percent in the major Hard Red Winter (HRW) growing States, the primary winter wheat-producing area. HRW production totaled 601 million bushels, up 13 percent from 2022.

In the Soft Red Winter (SRW) growing area, planted and harvested acreage increased from 2022. Coupled with several States estimated record high yields, SRW production totaled 449 million bushels, up 34 percent from 2022.

White winter wheat production totaled 198 million bushels, down 16 percent from 2022. Harvested acreage was down 3 percent from 2022.

Seeding of the 2023 winter wheat acreage began in mid-September 2022 with 10 percent sown by September 11. By October 9, producers had sown 55 percent of the intended 2023 winter wheat acreage, 3 percentage points behind the previous year and 3 percentage point behind the 5-year average. Nationwide, 26 percent of the winter wheat acreage was emerged by October 9, three percentage points behind the previous year and 6 percentage point behind the 5-year average. Emergence was at or behind the 5-year average in 16 of the 18 estimating States. Producers had sown 87 percent of the intended 2022 winter wheat acreage by October 30, one percentage point ahead of the previous year and 2 percentage points ahead of the 5-year average. Winter wheat planting had double-digit advances in 8 of the 18 estimating States during the week. Nationwide, 62 percent of the winter wheat acreage had emerged by October 30, three percentage points behind the previous year and 4 percentage points behind the 5-year average. Emergence was at or ahead of the 5-year average in 8 of the 18 estimating States. Overall, 28 percent of the 2023 winter wheat acreage was reported in good to excellent condition based on conditions as of October 30, compared with 45 percent at the same time the previous year.

Seeding of the 2023 acreage was at 96 percent by November 13, two percentage points ahead of the previous year and 3 percentage points ahead of the 5-year average. Winter wheat planting was complete or nearing completion (95 percent or more) in 13 of the 18 estimating States. Nationwide, 81 percent of the winter wheat acreage had emerged by November 13, one percentage point ahead of the previous year and equal to the 5-year average. Winter wheat emergence advanced by 10 percentage points or more from the previous week in 9 of the 18 estimating States. Overall, 32 percent of the 2023 winter wheat acreage was reported in good to excellent condition for the week ending November 13, two percentage points above the previous week but 14 percentage points below same time the previous year as the acreage was entering dormancy.

As the acreage was emerging from dormancy, 28 percent of the 2023 winter wheat acreage was reported in good to excellent condition, 2 percentage points below the previous year as of April 2. In Kansas, the largest winter wheat-producing State, 16 percent of the winter wheat acreage was rated in good to excellent condition. By April 23, eighteen percent of the Nation's winter wheat acreage was headed, 8 percentage points ahead of the previous year and 4 percentage points ahead of the 5-year average. On April 23, twenty-six percent of the 2023 winter wheat acreage was reported in good to excellent condition, 1 percentage point below the previous week and 1 percentage point below the previous year. In Kansas, the largest winter wheat-producing State, 14 percent of the winter wheat acreage was rated in good to excellent condition.

By May 14, forty-nine percent of the Nation's winter wheat acreage was headed, 3 percentage points ahead of the previous year and 1 percentage point ahead of the 5-year average. On May 14, twenty-nine percent of the 2023 winter wheat acreage was reported in good to excellent condition, equal to the previous week but 2 percentage points above the same time the previous year. In Kansas, the largest winter wheat-producing State, 10 percent of the winter wheat acreage was rated in good to excellent condition. By May 28, seventy-two percent of the Nation's winter wheat acreage was headed, 1 percentage point ahead of the previous year but 1 percentage point behind the 5-year average. As of May 28, thirty-four percent of the 2023 winter wheat acreage was reported in good to excellent condition, 3 percentage point above the previous week and 5 percentage points above the same time the previous year. In Kansas, the largest winter wheat-producing State, 10 percent of the winter wheat acreage was rated in good to excellent condition.

Twenty-four percent of the 2023 winter wheat acreage was harvested by June 25, fifteen percentage points behind the previous year and 9 percentage points behind the 5-year average. In Kansas, the largest winter wheat-producing State, 21 percent of the State's winter wheat acreage was harvested by June 25, thirty-three percentage points behind the previous year and 9 percentage points behind the 5-year average. As of June 25, forty percent of the 2023 winter wheat United States acreage was reported in good to excellent condition, two percent above the previous week and 10 percentage points above the same time the previous year.

Sixty-eight percent of the 2023 winter wheat acreage had been harvested by July 23, eight percentage points behind the previous year and 9 percentage points behind the 5-year average. Winter wheat harvest progress was complete or nearing completion in 8 of 18 estimating States. In Kansas, 87 percent of the State's winter wheat acreage was harvested by July 23, thirteen percentage points behind the previous year and 11 percentage points behind the 5-year average.

Winter wheat harvest progress continued with advances of 20 percentage points or more from the previous week reported in Colorado, Nebraska, Oregon, and South Dakota.

Ninety-six percent of the 2023 winter wheat acreage had been harvested by August 20, two percentage points ahead of the previous year and equal to the 5-year average. Winter wheat harvest progress was complete or nearing completion in all estimating States except Idaho, Montana, and Washington.

**Other spring wheat:** Production for 2023 was estimated at 505 million bushels, up 5 percent from the 2022 total of 483 million bushels. Harvested area totaled 11.0 million acres, up 5 percent from 2022. The United States yield was estimated at 46.0 bushels per acre, down 0.2 bushel from 46.2 bushels per acre in 2022. Of the total production, 468 million bushels were Hard Red Spring wheat, up 5 percent from the 2022 total.

Seeding of the 2023 spring wheat acreage began in April. Twelve percent of the spring wheat acreage was seeded by April 30, six percentage points behind the previous year and 10 percentage points behind the 5-year average. As of April 30, Washington led the Nation in planting progress with 74 percent. By April 30, two percent of the Nation's spring wheat acreage had emerged, 3 percentage points behind last year and 4 percentage points behind the 5-year average.

As of May 14, forty percent of the spring wheat acreage was seeded, 3 percentage points ahead of the previous year but 17 percentage points behind the 5-year average. Minnesota and North Dakota only had 3 percent and 2 percent seeded, respectively. As of May 14, thirteen percent of the Nation's spring wheat acreage had emerged, 2 percentage points behind the previous year and 10 percentage points behind the 5-year average. As of May 28, eighty-five percent of the spring wheat acreage was seeded, 15 percentage points ahead of the previous year but 1 percentage point behind the 5-year average. As of May 28, fifty-seven percent of the Nation's spring wheat acreage had emerged, 17 percentage points ahead of the previous year but 2 percentage points behind the 5-year average.

By June 25, thirty-one percent of the Nation's spring wheat acreage had reached the headed stage, 24 percentage points ahead of the previous year and 6 percentage points ahead of the 5-year average. Fifty percent of the Nation's spring wheat was rated in good to excellent condition, 1 percent below the previous week and 9 percent below the same time the previous year.

By July 16, eighty-six percent of the Nation's spring wheat acreage had reached the headed stage, 21 percentage points ahead of the previous year and 3 percentage points ahead of the 5-year average. Fifty-one percent of the Nation's spring wheat was rated in good to excellent condition, 4 percentage points above the previous week but 20 percentage points below the same time the previous year.

By August 20, thirty-nine percent of the spring wheat had been harvested, 8 percentage points ahead of the previous year but 7 percentage points behind the 5-year average. Harvest progress was 13 percentage points or more, behind last year, in Idaho, Minnesota and North Dakota. Thirty-eight percent of the Nation's spring wheat was rated in good to excellent condition, 4 percentage points below the previous week and 26 percentage points below the same time the previous year.

By September 3, seventy-four percent of the spring wheat was harvested, 6 percentage points ahead of the previous year but 3 percentage points behind the 5-year average. Harvest progress advanced 14 percentage points or more in 5 of the 6 estimating States during the week.

**Durum wheat:** Production for 2023 was estimated at 59.3 million bushels, down 7 percent from the 2022 total of 64.0 million bushels. Area harvested for grain totaled 1.60 million acres, up 1 percent from 2022. The United States yield was estimated at 37.0 bushels per acre, down 3.5 bushels from the 2022 yield. A record high yield was estimated in California in 2023. Production in Montana and North Dakota, the largest Durum wheat-producing States, were up 11 and 3 percent, respectively, from 2022. Harvest was 88 percent complete in Montana and 68 percent in North Dakota by September 10.

**Rye:** Production for 2023 was estimated at 10.4 million bushels, down 16 percent from the 2022 total. Harvested area totaled 322,000 acres, down 19,000 acres from 2022. The United States yield was 32.2 bushels per acre and was down

3.9 bushels from 2022. Planted area totaled 2.29 million acres, up 5 percent from 2022, and was the highest since 1988. Much of those acres were used as a cover crop.

## Statistical Methodology

**Survey procedures:** Objective yield and farm operator surveys were conducted to gather information on small grain acreage, yield, and production. The objective yield survey was conducted in 10 States that accounted for 64 percent of the 2023 winter wheat production. Early in the growing season, farm operators were interviewed to seek permission to randomly locate two sample plots in selected winter wheat fields. Throughout the growing season, counts such as number of stalks, heads in late boot, and number of emerged heads were collected from these plots. The plots were revisited each month until crop maturity when the heads were clipped, threshed, and weighed. After the farm operator harvested the sample field, enumerators revisited the sample to collect data in order to measure harvesting loss.

Data from operators was collected by mail, internet, or telephone, to obtain information on crop acreage, yield and production for the 2023 crop year. Approximately 55,900 producers were interviewed during the first two weeks of September and asked questions pertaining to planted and harvested area as well as yield and production.

**Estimating Procedures:** National and State level objective yield and grower reported data were reviewed for reasonableness and consistency with historical estimates. The survey data were also reviewed considering weather patterns and crop progress compared with previous years. Each Regional Field Office submits an estimate and written analysis for their State to the Agricultural Statistics Board (ASB). The ASB uses the survey data, administrative data, and the State analysis to prepare the estimates published in this report.

**Revision Policy:** Estimates contained in this report may be revised in the *Crop Production Annual Summary* report published in January should new information become available. Previous year acreage, yield, and production estimates can be revised in the *Small Grain Summary* published the following year, if new information is available that would justify a change. Estimates will also be reviewed after data for the 5-year Census of Agriculture are available. No revisions will be made after that date.

**Reliability:** The surveys used to make the acreage, yield, and production estimates contained in this report are subject to sampling and non-sampling type errors that are common to all surveys. Reliability of the objective yield and farmer survey must be treated separately because the survey designs for the two surveys are different. The objective yield indications are subject to sampling variability because all acres of winter wheat are not included in the sample.

The farm operator survey indications are also subject to sampling variability because all operations with small grains are not included in the sample. This variability, as measured by the relative standard error at the National level, is approximately 2.0 percent for winter wheat, 7.0 percent for Durum wheat, and 3.6 percent for other spring wheat. This means that chances are approximately 95 out of 100 that survey estimates for production will be within plus or minus 4.0 percent for winter wheat, 14.0 percent for Durum wheat, and 7.2 percent for other spring wheat of the value that could be developed by averaging the estimates produced from all possible samples selected from the same population and surveyed using the same procedures. The relative standard errors for barley, oats, and rye are 8.7, 7.2, and 11.7 percent, respectively.

Survey indications are also subject to non-sampling errors such as omission, duplication, imputation for missing data, and mistakes in reporting, recording, and processing the data. These errors cannot be measured directly, but they are minimized through rigid quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.

## Information Contacts

Listed below are the commodity statisticians in the Crops Branch of the National Agricultural Statistics Service to contact for additional information. E-mail inquiries may be sent to [nass@usda.gov](mailto:nass@usda.gov)

Lance Honig, Chief, Crops Branch .....	(202) 720-2127
Chris Hawthorn, Head, Field Crops Section .....	(202) 720-2127
Irwin Anolik – Crop Progress and Condition.....	(202) 720-7621
Joshua Bates – Hemp, Oats, Soybeans.....	(202) 690-3234
Natasha Bruton – Barley, Cotton System Consumption and Stocks, Grain Crushings.....	(202) 690-1042
David Colwell – Fats and Oils, Flour Milling Products.....	(202) 720-8800
Michelle Harder – County Estimates, Hay.....	(202) 690-8533
James Johanson – Rye, Wheat .....	(202) 720-8068
Greg Lemmons – Corn, Flaxseed, Proso Millet.....	(202) 720-9526
Becky Sommer – Cotton, Cotton Ginnings, Sorghum .....	(202) 720-5944
Travis Thorson – Sunflower, Other Oilseeds.....	(202) 720-7369
Jennifer Van Court – Peanuts, Rice.....	(202) 720-2127

## Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: [www.nass.usda.gov](http://www.nass.usda.gov).
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit [www.nass.usda.gov](http://www.nass.usda.gov) and click on “National” or “State” in upper right corner above “search” box to create an account and select the reports you would like to receive.
- Cornell’s Mann Library has launched a new website housing NASS’s and other agency’s archived reports. The new website, <https://usda.library.cornell.edu>. All email subscriptions containing reports will be sent from the new website, <https://usda.library.cornell.edu>. To continue receiving the reports via e-mail, you will have to go to the new website, create a new account and re-subscribe to the reports. If you need instructions to set up an account or subscribe, they are located at: <https://usda.library.cornell.edu/help>. You should whitelist [notifications@usda-esmis.library.cornell.edu](mailto:notifications@usda-esmis.library.cornell.edu) in your email client to avoid the emails going into spam/junk folders.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: [nass@usda.gov](mailto:nass@usda.gov).

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the [USDA Program Discrimination Complaint Form](#) (PDF), found online at [www.ascr.usda.gov/filing-program-discrimination-complaint-usda-customer](http://www.ascr.usda.gov/filing-program-discrimination-complaint-usda-customer), or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at [program.intake@usda.gov](mailto:program.intake@usda.gov).

**USDA Fall Data Users' Meeting**  
**Virtual Meeting**  
**October 17 & 18, 2023**  
**12:00 – 3:00 pm ET**

USDA's National Agricultural Statistics Service (NASS) will hold a virtual meeting for users of U.S. domestic and international agriculture data. NASS is organizing the 2023 Fall Data Users' Meeting in cooperation with five other USDA agencies – Agricultural Marketing Service, Economic Research Service, Farm Service Agency, Foreign Agricultural Service, and World Agricultural Outlook Board – and the Census Bureau's Foreign Trade Division. Representatives will provide agency updates, answer questions, and listen to concerns from data users.

**Abbreviated Agenda**

Day 1 – October 17

Agency Updates– *All agencies*

Focus on the 2022 Census of Agriculture - *National Agricultural Statistics Service*

The Use of Weather Information In Producing the WASDE - *World Agricultural Outlook Board*

NASS Historical Revisions and Estimating Program Review - *National Agricultural Statistics Service*

AMS Data Visualizations - *Agricultural Marketing Service*

Day 2 – October 18

Open Forum – *All agencies*

ERS Feed Grains Database: A comprehensive look at this valuable resource – *Economic Research Service*

Understanding Publicly Available Data from USDA-Risk Management Agency – *Risk Management Agency*

For registration details or additional information about the Data Users' Meeting, see the meeting page on the NASS website ([https://www.nass.usda.gov/go/data\\_users](https://www.nass.usda.gov/go/data_users)).
