

USDA Sprayer Technology Workshop

When: Tuesday, March 6 from 4:30 to 7:30 pm
Where: Toledo Botanical Gardens,
Crosby Conference Center Terrace Room and TBG Greenhouse
5403 Elmer Drive, Toledo, OH 43615

USDA-ARS engineers, entomologists, and pathologists will share research findings that will help greenhouse producers properly select spray equipment and increase the effectiveness of spray applications. USDA-ARS scientists will also relate their findings to plant health and nutrition topics. Following the classroom presentation, a dinner and hands-on demonstration of greenhouse spray equipment including spray coverage assessments will be provided.
