Compressed Gas Cylinder Quiz

[HOME](#)

First Name:

Last Name:

Student / Staff ID (email):

Supervisor:

Cylinders must be used in an upright and secured position

True False

The cap must be left on the valve when the cylinder is not in use.

True False

Mismatched threads may be used if they don't leak.

True False

Valves must be opened slowly.

True False

Regulators valves are an option, not a necessity

True False

If a leak occurs, just tighten all the fittings until the leak stops

True False

Any regulators valve works with any gas.

True False

If a leak occurs the cylinder should be taken outside, tagged, and the proper authorities notified..

True False

Oxygen may be substituted for compressed air

True False

Before removing a regulator valve, the cylinder valve must be closed and the regulator valve opened to release any pressure.

True False

NOTE! When finished, print out a copy, sign and date it, and return it to your Safety Officer
