Provisional Table on the Vitamin D Content of Foods

The values in this table are superseded by those in the
USDA National Nutrient Database for Standard Reference,
Release 16. Access to this table is provided here for those
users who may wish to use it for historical reasons.

For research use only

Prepared by John L. Weihrauch
and Junko Tamaki

**Provisional Table on the Vitamin D Content of Foods
(100 Grams Edible Portion)**

Users of this table should keep in mind that the data are provisional. Critical review of available data and further investigation will be necessary before definitive information can be published.

Mention of commercial products in this publication is solely for identification purposes and does not constitute endorsement by the U.S. Department of Agriculture over other products not mentioned. Mention of brand names is necessary to report factually on available data. USDA neither guarantees nor warrants the standard of the products, and the use of brand names by USDA implies no approval of the products to the exclusion of others which may also be suitable.

Items not in the National Nutrient Data Bank have not been assigned NDB numbers.

mcg = microgram

IU = International Unit (1.0 mcg = 40 IU)

NDB No.	Food item	Vitamin D <i>mcg</i>	<i>IU</i>
