

United States Department of Agriculture

Research, Education, and Economics
Agricultural Research Service

August 1, 2018

Dear Requestor:

Enclosed is a copy of our apple or tart-cherry catalog and a disclaimer stating some of our conditions. This catalog contains a very diverse list of accessions including wild species, interspecific hybrids, heirloom cultivars, other rare cultivars and commonly available commercial cultivars. We are now suggesting that unless a request for scions (graft wood) of common commercially-available cultivars is for research purposes, we ask that you obtain that material from a commercial source. If you are not sure, there are websites that list availability such as: <http://www.goodfruit.com/buyers>. A general search for cultivar sources on Google can also be done. There is one excellent source that we use here when the question of commercial availability comes to us. This is an excellent book **Fruit, Berry and Nut Inventory, Fourth edition**: An Inventory of Nursery Catalogs Listing All Fruit, Berry and Nut Varieties by Kent Whealy. It lists many nurseries that carry not only common commercial material but also heirloom and rare cultivars published by <http://www.seedsavers.org/>. If accessions are not available through commercial sources, we can provide scions/cuttings.

When selecting your order, the following conditions apply:

1. **Orders for dormant scions (limit 25) must be received by January 10th in order to ship by March 20.**
2. **Orders for summer bud wood (limit 25) must be received by July 15th in order to ship by August 20.**
3. **Orders for pollen, seed, fruit and other plant tissues may also be requested.**
4. **Original apple seed from Kazakhstan is reserved for use by scientists doing genetic research. However we can supply open-pollinated seed from our grow-outs which are a blend of all genes from many sites in Kazakhstan. Deadline for ordering is January 10th. If you have any questions, please contact us.**

Thank you for your interest in our program.

Sincerely,

Dr. C. Thomas Chao
Horticulturist/Curator for Apple and Tart Cherry

DISCLAIMER

The Plant Genetic Resources Unit (PGRU) at Geneva, New York is responsible for the acquisition, maintenance, evaluation, characterization and distribution of apple, cold-hardy grape and tart cherry germplasm. This wide array of genetic diversity is available **without charge** (unless there are special shipping requirements) to any *bona fide* plant scientist or plant propagator. Because of operational constraints, only limited quantities of each accession can be distributed.

Unless stated, the disease status (including viral, bacterial and fungal) of the enclosed material has not been determined. All distributed germplasm is subject to local, state, national and/or international quarantine regulations.

The authenticity of the identity of the requested accession(s) has been determined by the best presently available methods; however, determinations are not guaranteed. **The PGRU at Geneva assumes no responsibility for the plants and/or propagules shipped.** Questions, comments and suggestions should be directed to:

**USDA, ARS Plant Genetic Resources Unit
630 West North Street
Geneva, New York 14456-0462
United States**

Dr. C. Thomas Chao
Horticulturist/Curator for Apple and Tart Cherry

Dr. Ben Gutierrez
Geneticist/Curator for Grape

PLEASE NOTE:

All foreign orders must include an Import Permit, where appropriate. Please check with your Country's Plant Inspection and Quarantine Center. A copy of the Import Permit or Letter of Authority, translated into English, must be enclosed with the request. We cannot certify that our plants are Disease and/or pest free. Your permit must grant you a Research Exemption from this requirement.
