

Personal Bio

Dr. Li Li is a USDA-ARS Research Molecular Biologist at the Robert W. Holley Center for Agriculture and Health on the Cornell campus in Ithaca, NY. She is also an Adjunct Professor in the Plant Breeding and Genetics Section, School of Integrative Plant Science, at Cornell University. Dr. Li Li received her Ph. D in Plant Physiology and Biochemistry from the University of Reading in England. Currently, her research program focuses mainly on understanding the mechanisms underlying phytonutrient (carotenoids, flavonoids, and glucosinolates) and micronutrient (selenium, zinc and iron) metabolism for improving the nutritional quality and health-promoting properties of food crops.
