

Instructions for installation

IPMPGlobalFit has been compiled for the Windows operating system. Please follow the following procedures for installation. Please refer to the tutorial (IPMP Global Fit Tutorial.pdf) for instructions on how to use the software.

- 1) Download and save this file to your computer, preferably the Desktop.
- 2) Double click  IPMPGlobalFit.zip. An interface will open.
- 3) Click to select IPMPGlobalFit.zip.
- 4) Click Extract to a directory. The default direct will be ..\Desktop\IPMPGlobalFit. Change directory if necessary.
- 5) Once unzip, open the directory containing IPMPGlobalFit files in your computer.
- 6) Keep all files under the same directory. Do not remove or delete any files.
- 7) Click IPMPGlobalFit.exe, and the program should work.
- 8) Or, you can right-click IPMPGlobalFit.exe, click Send to, then choose “desktop”. A shortcut will be created on the Desktop. Click the shortcut Icon “IPMPGlobalFit.exe Shortcut” to start the program.
- 9) The program may start up slowly, depending on the speed of your computer. Please be patient when it starts up. Once starting up, the program should run smoothly.
- 10) The program does not make any changes to Windows’ registry.
- 11) If you have any question, please e-mail Lihan.Huang@ars.usda.gov.
