

Global Foot-and-Mouth
Disease Research
Alliance (GFRA)

GFRA Workshop

17-19 April 2012

Surveillance, Epidemiology, Vaccination and Control of Foot-and-Mouth Disease

Hosted by the ARC-OVI in Hazyview, Kruger National Park,
South Africa

Goal:

To share the latest knowledge on FMD virus ecology, to improve vaccine efficacy and vaccine matching within the GFRA.

Program content:

1. FMDV-wildlife interaction and pathogenesis
2. Epidemiology and control in different regions of the globe
3. Vaccine efficacy
4. New and current approaches to vaccine matching

Participants:

GFRA and non-GFRA members involved or interested in the topics mentioned.

Costs:

GFRA members please contact Francois F Maree (mareef@arc.agric.za) or Katherine Scott (scottk@arc.agric.za) for additional information.

Non-GFRA members are to cover all expenses at their own cost.
